

GetGenome Newsletter

September 2024

We are pleased to present the September 2024 edition of our monthly newsletter, providing a snapshot of GetGenome's progress and key highlights. Remember, you can find all our monthly newsletters here - <https://getgenome.net/network>. The main highlights this month include:

GetGenome celebrated in PLOS Biology

98

researchers

393

organisms studied

1,957,703,649

bases sequenced

121

BioSample accessions

25

publications

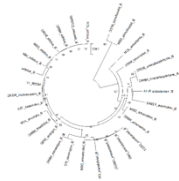

>1,000

publication downloads

We are thrilled to announce that GetGenome's remarkable journey has been featured in a recently published article in [PLOS Biology](#). The article, alongside the related coverage in [TSL News](#), highlights key milestones and achievements that have defined GetGenome's mission to democratize access to genomics technology.

Over the past two years, GetGenome has grown from a pioneering concept into an inspiring enterprise, supporting 100 researchers and sequencing over 400 organisms and plasmids across 4 continents. A heartfelt thank you to all our contributors, partners, awardees and funders for making this progress possible.

First GetGenome drop-in sessions

Last month, GetGenome ran two, informal 1 hour drop-in sessions to support awardees to analyse and deposit their genomics data. We believe that these sessions were very useful for the attendees. Do you want more? Contact us.

GetGenome at the TSL Summer Conference

We recently had the opportunity to showcase GetGenome, not once but twice during the two-week TSL Summer Conference 2024 held in Norwich, UK (<https://shorturl.at/Fgrll>). It was a great pleasure for us to interact with talented delegates from around the world and share ideas.

GGLatAm2024 awardees onboard

Following application assessments by our fantastic [GGLatAm2024 Committee](#), we have selected 18 researchers from 6 Latin American countries to join GGLatAm2024. We look forward to working with them in the coming weeks and months to support their projects.

Our social media presence is growing – please join us!

GetGenome is growing its presence across social media platforms. We've recently uploaded several videos to our [YouTube channel](#) that may be of interest to you including a recent talk featuring several GetGenome participants. [Facebook](#) and [X](#) are great places to keep up-to-date with GetGenome news.
