

GetGenome Newsletter

October 2024

We are pleased to present the October 2024 edition of our monthly newsletter, providing a snapshot of GetGenome's progress and key highlights. Remember, you can find all our monthly newsletters here- <https://getgenome.net/network>. The main highlights this month include:

GGMENA2024 – One of our largest Call For Projects

GGMENA2024 may become the largest CFP GetGenome has developed to date! Researchers from across the region, including an impressive 46% who are students, are now joining GetGenome. We are especially thrilled by the strong representation from north-west Africa, which promises exciting new opportunities for collaboration and knowledge exchange in the region.

Accessible Genomics, Accessible Science

Last week, James had the pleasure of presenting GetGenome to an audience of over 600 researchers, lab technicians, college students and more. We will be sharing the talk on our [YouTube channel](#) soon, so stay tuned. While we're still at the beginning of our journey, it's important to reflect on how far we've come and thank everyone who has supported our mission to make genomics accessible to all.

We love hearing from you (and we've made it easy)

We know paperwork isn't the most exciting part of research, but your feedback is vital! It helps us understand the impact our support has on you, your research community, and beyond. That's why we've created this quick, easy-to-complete [report form](#) for Awardees (those that we have supported) to help GetGenome enhance its support and reach even more researchers.

GGPlasmidSeq is still open!

Don't forget, if you are based in any one of the 100+ eligible countries, you can apply to have your plasmids sequenced by GetGenome, completely free of charge. For more information and the application form go to <https://getgenome.net/callforprojects/ggplasmidseq2023>

Look out for new GetGenome campaigns opening soon!

Follow us on social media ([X](#), [Facebook](#), [LinkedIn](#), [YouTube](#), [Instagram](#)) for all the latest developments at GetGenome including announcements of our latest Call For Projects and other opportunities.
