

GGFungi2026 – List of **non-approved** fungi

If your fungi of interest is one listed below (falls inside the genus listed) then unfortunately, we cannot authorise it for sequencing at this time.

Note that all organisms will require molecular characterisation and authorisation before being on-boarded for sequencing. If your project is selected, authorisation is not guaranteed.

Note: we hold licences for some plant pathogenic fungi. In some circumstances we may authorise strains that fall within these licences on a case by case basis.

Aspergillus spp.
Blastomyces spp.
Candida spp.
Cladosporium spp.
Cladophialophora spp
Coccidioides spp.
Cryptococcus spp.
Emmonsia spp.
Epidermophyton spp.
Exophiala spp.
Fonsecaea pedrosoi (formerly Fonsecaea compacta)
Fusarium spp.
Geotrichum spp.
Histoplasma spp.
Madurella spp.
Malassezia spp.
Microsporum spp.
Nannizzia spp.
Neotestudina rosatii
Paracoccidioides spp.
Paraphyton spp.
Rhinocladiella mackenziei (formerly Ramichloridium)
Rhizomucor pusillus
Rhizopus microsporus
Saksenaea vasiformis
Scedosporium spp.
Sporothrix schenckii
Talaromyces marneffeii (formerly Penicillium marneffeii)
Trichophyton spp.
Trichosporon spp.
