

GetGenome Newsletter

#036

March 2026

We are pleased to present the March 2026 edition of our monthly newsletter, providing a snapshot of GetGenome's progress and key highlights. Remember, you can find all our monthly newsletters here - <https://getgenome.net/network>. The main highlights this month include:

Call For Abstracts – ERC Symposium Microbial Genomics

Submit Abstracts here
Deadline 30th April

The Early-Career Symposium is an international event showcasing research from across microbial genomics. We want your work to reach a wide audience — and your story doesn't need to be complete or perfectly polished to take part. We've made participation simple: just scan the QR code to submit your abstract. If selected, you'll be invited to record a short PowerPoint talk to be featured on 15th July. If you want more information, contact getgenome@tsl.ac.uk. Everyone is welcome to attend.

#GGFungi2026 going global: 🍄 Unlock the potential of your fungi!

The #GGFungi2026 CFP is open is officially live, and the response has been incredible. As you can see from our map, we're already fielding inquiries from every corner of the globe—from the Andes to the Himalayas. GGFungi2026 will support researchers ready to unlock the potential of their fungi — and your project could be part of it. [Apply here](#). Deadline: 21st April.

GetGenome featured at Asilomar 2026

A must-attend event for any fungal genomics researcher, the Fungal Genetics Conference at Asilomar once again brought together a vibrant global community at its 33rd edition. GetGenome was proud to be well represented, engaging with researchers, sharing our work and connecting with the community. These interactions continue to strengthen our growing global network, enabling us to reach and support an ever more diverse community of researchers.

The Micro-quiz had Mega-impact

A big thank you to Dr Muhammad Yasir of the Quadram Institute for organising the event in support of GetGenome. Yasir has been a long-standing advocate of our mission to empower researchers, previously serving as Vice-Chair for our efforts in Pakistan — a community he continues to champion with great passion.
