

GetGenome Newsletter

#039

June 2026

We are pleased to present the June 2026 edition of our monthly newsletter, providing a snapshot of GetGenome's progress and key highlights. Remember, you can find all our monthly newsletters here - <https://getgenome.net/network>. The main highlights this month include:

Don't miss the 2026 Microbial Genomics Symposium on 15th July

Just two weeks until our, early-career Symposium: An engaging full-day of microbial science flash talks. This fun event will feature microbiomes, human and plant pathogen research, symbiotic relationships and much more. We are delighted that three international speakers, and two keynote speakers will also present their science. Register for virtual attendance up to the day of the event on 15th July - <https://jic.link/ECRMGS-online>

GetGenome seminar: Fungal genomics with Dr Sergio Latorre

From Contigs to Clades: Insights into Fungal Population Structure

Join us to learn how to interpret fungal population structure using phylogenetics, ancestry analysis and dimensionality reduction, with practical insights into variant filtering and tips to handle the unique challenges of fungal genomes.

Virtual | 8 July 2026 | 14:00–15:00 CEST (13:00 UK) | [Register - Seminar July 8th](#)

IS-MPMI Road to Jeju webinar series

The Road to Jeju webinar series is a programme of online seminars running in the lead-up to the 2027 IS-MPMI Congress in Jeju, South Korea. GetGenome is proud to support the [International Society for Molecular Plant Microbe Interactions \(IS-MPMI\)](#) to run the series which will feature both Legends and the Rising Stars of IS-MPMI. The latter is a platform for early-career researchers to present their work to the global community. Nominations close imminently: [Rising Stars of IS-MPMI Self-Nomination Form](#) but look out for upcoming webinars and opportunities from the society.

To mark this wonderful series and event, we are soon launching a new open Call for Projects: **GGPlantPathogens2026** – supporting researchers studying plant pathogens. Join our [Mailing List](#), and follow us on social media @GetGenome for updates.

The GetGenome *AI in Genomics* workshop – deadline approaching!

The highly anticipated GetGenome AI in Genomics workshop is taking place at two venues in Tunisia between 14th and 18th September. If you are based in the MENA region and want to attend a workshop, use the QR code to register (CBBC: north Tunisia and international; ISBS for southern Tunisia).
